Re: Update Flow Study by the IBI Group
State St. Pump Station Sewer Shed

Brianne and Joe,

As part of the City of Struthers and Mahoning County's over all flow reduction plan. Please find the attached sewer map showing flow meter locations for the impending flow study of the State St. Pump Station sewer shed.

The flow study is scheduled to begin on March 18, 2019 and run through May 2019. The County will also start their portion of the flow study on March 19, 2019 to run through May 2019.

Phase I of the City's plan is to trend the amount of I&I in this area that is contributing to the State St. pump station overflows.

Phase II will be to pin point and eliminate the sources of I&I by televising and smoke testing the target areas, as to reduce the number of overflows at the State St. Pump Station.

If you require any further information please do not hesitate to contact me.

Sincerely,

Guy C. Maiorana
Plant Manager SWWTP
